You CAN be Two Places at Once

With Restaurant Manager's™ Mobility Solutions you can be a hands-on manager no matter where you are. Using a standard web browser, SMS text messaging, your PDA, email or even the Write-On Handheld™ you can access and receive updates in real-time for an up-to-the-minute picture of what is going on in your business. You can view the information from another restaurant, from your home office or from your favorite vacation spot to keep a close eye on your business without being trapped there seven days a week.

Providing Solutions to Real Business Problems

Restaurant Manager focuses on critical business issues facing today's restaurant owner. With Restaurant Manager you get robust functionality, fully integrated optional modules and the expertise needed to solve real business issues and meet your unique goals.

Business Need/Goal	How Mobility Solutions Help
Access to information	Use a browser, email, cell phone or PDA to keep on top of real-time data.
Limit information access to those that need it	Security levels ensure that only the people you grant access to can view your important data.
Better manage daily performance	Get insight into operational metrics and compare to past performance.
Reduce fraud, theft and waste	Access information and alerts from virtually anywhere to maintain and improve operations while you are away from the restaurant.

Providing Options for Today's Busy Owner/Manager

Monitor real-time cost of sales, view the latest item deletions or check which employees are still on the clock. It's even easy to view reports on-screen or print them to a local printer.

Of course system security is guaranteed no matter how you connect. User defined security levels and passwords ensure that only authorized personnel have remote access to the system. Your access of the system goes undetected on-site, even though you are gathering and viewing data in real-time.

The Restaurant Manager Browser Interface used with online reporting capabilities is just one example of the control and freedom Restaurant Manager can offer. In addition Restaurant Manager uses today's technologies – such as an iPhone or Windows Mobility enabled device, such as a Blackberry – to provide you with access to the information needed helping ensure your business is running smoothly from virtually anywhere.

Manage from Virtually Anywhere

Cell phones and PDAs are just two ways you can stay on top of operations.

Restaurant Manager Tips

1. With fully integrated Online Ordering you can use Restaurant Manager's Mobility Solutions to receive an alert everytime an online order is received.
2. Using real-time Alert capabilities you maximize the management impact of Restaurant Manager functionality. One way to use Alerts is to let you know when there is a high spending table enabling truly personalized service.
